

## 2BMFG architects

2BMFG arquitectes S.L.P. is an Architecture Office directed by 5 senior architects, Carles Buxadé, Joan Margarit, Ramon Ferrando, Carles Gelpí and Àgata Buxadé, working together with a highly qualified team of professionals that develop projects from concept stage, through planning, construction and completion. We provide full architectural design, including masterplanning, installations and structure calculations. We can also work together with the building company to develop the project and control the entire building process. We always work to come up with financially viable projects that are sustainable over time.

The studio is located in Barcelona (Spain) and has more than 30 years of professional experience.

We have all taught concerning the calculation of structures in various Spanish Universities and also in calculation masters. Joan Margarit and Carles Buxadé are both PhD in architecture and full professors of structure calculations at the Polytechnic University of Catalonia and have been Master Directors for several years.

Since July 2014 2BMFG arquitectes is a study of architecture certified in Quality Management and Ecodesign according to ISO 9001 and ISO 14006.

## Carles Buxadé i Ribot

Barcelona 1942
